EDUCATION

B.Sc. in Software Engineering

Shahjalal University of Science and Technology, Sylhet

February 2023 – Present | CGPA: 3.48/4.00

COMPETITIVE PROGRAMMING & PROBLEM SOLVING

Total solved: 850+ problems in various judges & Became Pupil in Codeforces(max rating:1270)

📊 **Codeforces** [Levi_Ackerman_13](#) max rating: **1270 (Pupil)** · [al_goodman13](#) 500+ CF problems solved across both accounts

🔗 **LeetCode** [uthred_ragnarson](#) 150+ problems solved

👤 **CodeChef** 100+ problems solved

PROJECTS

Social Media Platform [GitHub](#) | [Live](#) | [VideoDemo](#)

- A full-stack social platform supporting photo posts, short-form video reels (60s), likes, comments, follow system, and a public discovery feed for new users.
- Implemented real-time messaging and live notifications using Socket.IO, JWT authentication via httpOnly cookies, and Cloudinary for image/video storage.
- Designed the Toolkit state architecture across auth, feed, messaging, and notification slices to keep UI state consistent with live socket events.
- Deployed frontend on Vercel and backend on Render.

🔗 React 🔗 Node.js 🔗 ExpressJs 🔗 Socket.IO 🔗 MongoDB

Cinema Review Platform [GitHub](#) | [Live](#) | [VideoDemo](#)

- Engineered a full-stack IMDb-style platform (MERN) enabling users to rate/ review movies, and series, engage in threaded discussions with nested replies, and maintain separate watchlist and watched-history lists, alongside a curated news section for industry updates.
- Built with React, Node.js, Express, and MongoDB; implemented JWT-based authentication with role-based access control (user/admin), RESTful APIs, and Cloudinary integration for optimized image handling.
- Designed a scalable MongoDB schema using polymorphic references to unify reviews, discussions, and watchlists across both movies and series, avoiding data duplication while supporting flexible content types.

🔗 React 🔗 Node.js 🔗 ExpressJs 🔗 MongoDB 🔗 JWT

Job Searching Platform [GitHub](#) | [Live](#) | [VideoDemo](#)

- A job-searching platform, enables job seekers to find opportunities and employers to publish job listings.
- There is a news-feed section, users can interact with each other, can express their feelings, react and comment on each other's posts
- Implemented search and filtering functionality to help users quickly identify relevant positions.

🔗 React 🔗 Node.js 🔗 ExpressJs 🔗 MongoDB

Reelz-Short-Video App(Flutter) [GitHub](#) | [VideoDemo](#)

- It's a short-video mobile application with a vertical swipe feed, autoplay, and client-side video compression. Users can create profiles, upload videos and interact with each other.
- Implemented JWT authentication, real-time messaging with Socket.IO, following functionality using Node.js, MongoDB

🔗 Flutter 🔗 Dart 🔗 Node.js 🔗 MongoDB 🔗 Socket.IO

Music&Podcast Listening Site [GitHub](#) | [VideoDemo](#)

- An audio streaming platform supporting music, podcasts, and audiobooks, with role-based listener/artist interfaces, JWT authentication, and Cloudinary-based media uploads.
- Implemented a custom audio player with queueing, seek/volume controls, true offline playback via Cache API

🔗 React 🔗 Node.js 🔗 Express 🔗 MongoDB

MORE PROJECTS

2D Snake game(C++,SDL)	Video Demo	github
Travel Assistant Android App(flutter)		github
Student Hall Management System(MERN)		github
Restaurant Website(html,css,js)	Live	github
Portfolio Website(html,css,js)	Live	github

Ping-pong Game(java)	Video Demo	github
ShopEase—E-commerce Platform(MERN)		github
Calclator App(Java)		github
Tic-tac-toe game(js)		github
English Dictionary App(js)		github

TECHNICAL SKILLS

LANGUAGES 🔗 C/C++ 🔗 JavaScript 🔗 Java **FRONTEND** 🔗 ReactJs 🔗 Tailwind CSS 🔗 Flutter **BACKEND** 🔗 Node.js 🔗 Express.js 🔗 JWT Auth

DATABASE 🔗 MongoDB 🔗 MySQL **TOOLS & PLATFORMS** 🔗 GitHub 🔗 Vercel 🔗 Render **TESTING** 🔗 JUnit & Selenium

ACADEMIC RESEARCH

Topic: Interpretable IoT Intrusion Detection Using Ensemble Learning and Genetic Feature Selection

Submitted to the International Conference on Innovations in Science and Technology, 2026

Proposes an interpretable IoT intrusion-detection framework using genetic feature selection and ensemble learning. Achieves 98.67% accuracy on CICIoT2023 while detecting unknown attacks.

PERSONAL DETAILS

Date of Birth: 02 January 2002 | **Blood Group:** B+

Interests: Machine Learning, Deep Learning, AI, Photography, Travelling
